To US DoJ:

I beleive that Microsoft is a leader and innovator in developing innovative and useful software for the general public. I don't believe that it is in the Government's best interest to drag this case out. I strongly feel that many of the State's objections to the Microsoft is disingenuous at best and specious in fact. I remember seeing a Oprah Winfrey program that featured Larry Ellison of Oracle wherein he stated that he would donate I believe some 10 million dollars in software to the school system. I don't believe there was any outcry from Apple or anyone else! Microsoft does much to help individuals develop software much like IBM did at one time. I hope that the US Government and the States can come to a resolution soon for the sake of the economy.
